Dear Mr. Fronk:

This is in response to your recent request for a Material Safety Data Sheet for Industrial Vermiculite #2 which you have been using as packing material.

I am attaching a copy of our M.S.D.S. #Z-140, Industrial Vermiculite, Libby Source - Size #1, #2 & #3.

#3 Expanded Vermiculite is also marketed to consumers as Attic Insulation. When processed for this end-use, it is more intensively screened to remove fines (vermiculite dust and tremolite) and in some cases, it is treated with a binder to further reduce airborne dust when used. This further reduces the exposure of the user to airborne tremolite fiber. You may wish to purchase this to limit dust exposure. It is readily available at most building supply houses.

We have prepared the attached Material Safety Data Sheet in a form that is most meaningful to technically aware industrial end-users who will be aware of the responsibilities placed on them by OSHA Regulations.

It has been our experience, handling significant tonnages of expanded products in our own manufacturing plants, that good industrial hygiene practices will limit the airborne exposures of employees to extremely low levels.

If you require additional information, do not hesitate to contact me.

Very truly yours,

Diane O'Donnell

SECTION II - HAZARDOUS INGREDIENTS

Contains less than 0.1% by weight of a naturally occurring contaminant tremolite. OSHA Regulation 1910.1001 defines tremolite as asbestos. Some forms of tremolite are platy. Other forms can be fibrillated by physical handling to release airborne "asbestos fibers". Regulation 1910.1001 places a limit of 2 "asbestos fibers"/cc; 8 hour time weighted average and a maximum of 10 "asbestos fibers"/cc at any one time for airborne fiber exposure.

The physical handling given to expanded Vermiculite can release both airborne fibers and nuisance dust. Refer to OSHA Regulation 1910.1001 for approved control procedures.

SECTION VII - SPILL OR LEAK PROCEDURES	
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED	
Dampen slightly or use other techniques which control airborne fibers and dust within the limits of Section V above.	
WASTE DISPOSAL METHOD	
Use disposal techniques which control airborne fibers and dust within the TLV limits of Section V above. See OSHA Standard 1910.1001. Paragraph (h) (2) Waste Disposal.	

SECTION VIII - SPECIAL PROTECTION INFORMATION	
See OSHA 1910.1001-Controls such as isolation; enclosure, exhaust ventilation and dust collection shall be used if necessary to meet exposure limits. Also see OSHA Standard 1910.1001 Personal Protective Equipment for dealing with work environments in excess of exposure limits.
